Announcement on Third Quarterly Report 2024

Important Notice:

From January to September 2024, the Company realized net profit attributable to shareholders of the listed company of RMB23,212,871.27, a decrease of 98.07% compared to the same period of last year. In the first three quarters of 2024, the Company's performance declined year-on-year mainly due to the following reasons: 1) The polarizer business and anode business were affected by industry cycle fluctuations, and the market competition was fierce, resulting in a decline in product prices and a significant decrease in net profit compared to the same period last year; 2) The Company continued to push forward its focus strategy, divested non-core assets, and some of its equity-invested enterprises suffered significant losses, which had an adverse impact on the Company's performance for the current period; 3) Last year, the Company sold partial equity of its electrolyte business, approximately recognizing investment income RMB244 million, but there was no corresponding investment income from this business in the current period.
